

Novel influenza A(H1N1), Worldwide

Situation **up to 04 May 2009 at 06:00 PM**

Worldwide epidemiological situation

- Cases are being confirmed or excluded continuously. The data available worldwide as of 4th of May 2009, at 05:00 PM are presented below. Please note that each country has its own case definition. Within one country, the case definition may change overtime. These two elements have to be considered in the interpretation of the number of reported cases.
- Globally, we still observe an increase trend of probable and confirmed cases. Available elements do not indicate a change in the epidemic dynamic.
- Some secondary cases are still under investigation and some have been identified.
- To date, no death has been notified out of Mexico (except 1 death in USA).
- In Mexico, the stabilisation trend of suspect cases number need to be confirmed overtime.

France

- On 04 May 2009, 2 additional confirmed cases have been notified. In total, there are 4 confirmed cases and 8 probable cases.
- To date, no severe cases have been reported. All confirmed cases are imported cases.
