

## Novel influenza A(H1N1), Worldwide

Situation up to 05 May 2009 at 05:00 PM

### Worldwide epidemiological situation

- Cases are being confirmed or excluded continuously. The data available worldwide as of 5<sup>th</sup> of May 2009, at 05:00 PM are presented below.
- Globally, the increase trend of notified confirmed cases continues. However, the available data are still insufficient to appreciate, at this stage, the epidemic current dynamic.
- Secondary cases continue to be notified and to date; no new death has been notified.
- In North America, the number of confirmed cases is still increasing. In New-York, although the active community transmission is not confirmed, this transmission should be considered as probable.
- The number of confirmed cases has increased in Europe, especially in Spain and in United-Kingdom: 2 cases who came back from USA (but not from Texas or California)

### France

- To date, 4 confirmed cases and 7 probable cases.
- All confirmed cases are imported cases. To date, no severe case has been reported.
