General objectives

- Formation of scientific and professional communities in each country concerned with migrant and minority health
- Stimulate the development of good practices by promoting the exchange of information and expertise, both within and between countries

Outcomes

- Wikis in 16 European countries that will contain information on migrant and minority health research and practice
- A European wiki that will provide access to the national wikis and will contain general information on the project

Outcomes

- Networks of experts, practitioners and stakeholders will be built up through the wikis and the dissemination of the project
- National meetings will be held bringing together experts and representatives of stakeholders in order to exchange views on the topic at stake

Outcomes

European meeting and press conference in Brussels to bring together European policy makers and experts, as well as representatives from national authorities, to announce the project's results
